

# Conduct advanced tip truck operations Training

FTS Safety Offers 3 Day Conduct advanced tip truck operations Training Unit Standard 117034

Unit Standard 117034 –Conduct advanced tip truck operations Training  
3 Day Course

We don't offer this course as a public class. A minimum of 5 candidates is required to facilitate it.

This course provides learners with the knowledge and practical skills to plan, prepare, and safely conduct advanced tip truck operations within a civil construction environment. It covers legal and workplace requirements, site preparation, road anatomy, safe hauling and dumping techniques, transportation between worksites, and basic operator maintenance in line with statutory standards.

## What You'll Learn:

- Interpret job instructions and plan tip truck operations effectively
- Understand and apply legal, safety, and workplace requirements
- Identify and prepare safe work areas and construction sites
- Understand basic road anatomy and drainage principles
- Perform advanced tip truck manoeuvring, hauling, and dumping operations
- Operate safely under varying ground, load, and weather conditions
- Conduct routine inspections and basic operator maintenance
- Transport a tip truck safely between worksites
